PROFESSIONAL EXPERIENCE

Software Developer

PioneerRx Pharmacy Software - Jun 2018 - Present

Shreveport, LA

My current work consists of full stack development. I implement, design and manage projects using variety of technologies.

- In charge of data syncing on production servers. I monitor and maintain SQL driven data syncs between pharmacies.
- Was the main developer on PioneerRx application performance project. Improved the application performance on both SQL and .NET side, which decreased the load time significantly.
- Developed a crucial feature that performs Rx dosage checks and prevents pharmacists from releasing prescriptions that could potentially be detrimental to a patient.
- Automated numerous tasks that were manual and were taking long time to execute. Mainly focused on DevOps and CI/CD.

Graduate Research Assistant

LSU Shreveport - Feb 2017 - May 2018

Shreveport, LA

Worked on a variety of biomedical informatics projects. I learned and worked on managing and analyzing biological, chemical, and medical processes.

- Created numerous databases, diagrams and visualizations using Java, R, PHP, and MySQL.
- Communicated with doctors on a daily bases regarding project analysis.

Intern/Junior Software Developer

Benetech Corporation - Oct 2015 - May 2016

Belgrade, Serbia

Learned and acquired new skills using various programming technologies, worked on development of the systems for content management.

- Developed numerous features for science articles publishing web application using Java, Spring, Alfresco, and SQL Server.
- Participated in scrum meetings and discussions.
