PROFESSIONAL EXPERIENCE

Software Development Team Lead

PioneerRx - Jan 2023 - Present

Shreveport, LA

Leading two teams of software developers implementing an application for independent pharmacies.

- Guiding and supporting developers with design and implementation
- Responsible for code quality delivered by team members
- Generating metrics to keep track of progress for all projects

Software Developer

PioneerRx - Jun 2018 - Jan 2023

Shreveport, LA

Worked on full stack development. Implemented, designed and managed code for a pharmacy software.

- Implemented a Git repository for source controlling SQL changes and releases of the main production database
- Developed and monitored data syncing processes for all production servers
- Developed a crucial feature that performs Rx dosage checks and prevents pharmacists from filling prescriptions that could potentially be detrimental to a patient
- Built Azure CI/CD pipelines in order to streamline manual processes

Graduate Research Assistant

LSU Shreveport - Feb 2017 - May 2018

Shreveport, LA

Worked on a variety of biomedical informatics projects. I learned and worked on managing and analyzing biological, chemical, and medical processes.

- Implemented numerous databases, diagrams and visualizations for analyzing biological, chemical, and medical processes in the interest of improving medicine and patient care
- Created web application for medical students that improves their learning techniques through case studies

Intern/Junior Software Developer

Benetech Corporation - Oct 2015 - May 2016

Belgrade, Serbia

Learned and acquired new skills using various programming technologies. Worked on development of the systems for content management.
